PERSONAL PROFILE

A software developer with experience building full stack applications using various technologies. Enjoys a good challenge, solving puzzles and providing solutions to problems. Team player able to add contribution wherever needed and a positive outlook. Seeking an opportunity to not only gain new skills, but improve and polish existing ones.

EXPERIENCE

Software Development Student

CodeWorks

August 2020- November 2020

- Built several full stack applications using Vue.js, Node.js, and C# while implementing the MVC design pattern
- Collaborated with peers and used Scrum best practices to stay organized and efficient
- Practiced partner programming and communicated effectively about error codes and debugging
- Utilized Figma to create application mock up designs and functionality
- GRMblr- An application that helps solve the "Where should we eat" question. This application utilizes the google web api. The tools used for this project are Nodejs and Vue.
- Kanban - This application allows boards to be created and lists to be created on the board. On the lists tasks can be added. This project was built with Node.js and vue.
- Bug Log - This application allows you to keep track of bugs that need to be fixed. You can then mark them as open or closed when finished. Node.js and Vue were used on this application.

Screen Printer

D&S Specialties inc.

September 2018 - September 2019

- Prepare clothing items for screen printing
- Fold and package items for shipping to a variety of different places, several being out of state.
- Printed t-shirts for both large and small companies.

Cook/Teacher

Calvary Christian Daycare

July 2017 – August 2018

- Opened facility by checking in first arrivals and making sure that the classrooms were clean and ready to go.
- Cared for children of multiple ages
- Prepped, cooked and served all meals to over 50 children twice a day.
- Data entry of all meals served using the program Minute Menu. This would ensure that the daycare would receive financial reimbursement for food costs.
- Provided customer service to parents and peers about the well-being of the children, ongoing activities, and to answer any questions about the daycare.

Baker

Albertson's

April 2015 - June 2017

- Took cake orders either by phone or in person
- wrote on cakes by request or according to an order
- baked goods for stocking
- stocked shelves with fresh baked goods or items from the freezer.
